## Smart Design for a Better World

We believe design matters.  
We believe in the highest level of craft.  
We believe in supporting those who create it.  
We believe in better ways to make better products.  
We believe in promoting a healthy, active lifestyle.  
We believe in taking care of the planet.  
We believe in social responsibility.

Visit [3-form.com/inspiration/we-are-3form](https://3-form.com/inspiration/we-are-3form) to learn more.

## align

We believe it's imperative to align the creation of beautifully designed products with actions and practices that help protect and nourish the planet. At the 3form family of companies (3form, LightArt, and EFI), these actions and practices are collectively called Align — our platform of Earth and people-centric initiatives that will guide our path forward.

Three main pillars – **people, product, planet** – provide the framework for Align. These pillars translate into a focus on human well-being alongside design methods and manufacturing processes that conserve and restore the planet.

*Learn more about our specific actions at [3form.com/align](https://3form.com/align)*

## Responsible Manufacturing

We create products from the highest quality materials that contribute to positive environmental and social impact. We start by measuring and reporting our environmental impact through life cycle analyses and third-party verifications.

- Leader of the Living Future Institute's Declare label
- Environmental Product Declarations (EPD's)
- Health Product Declarations (HPD's)

# Flek Innovative Engineering

Our latest material innovation, Flek, is one example of Align in action. More than ten years of R&D and the use of optical sorting technology made this sustainable material possible. We take waste material from the production process of Varia panels, grind it into small pellets, sort out remnants of interlayers, and press the pellets into new, beautiful Flek panels with approximately 75% recycled material.

See page 128 for all Flek colors.

Pattern | Flek Chamomile, Avenue, Blood Orange

## Environmental Goals

Our legacy of sustainability continues with our path to zero which is our commitment to continually reduce our environmental footprint. We believe in leadership by continuous improvement with an emphasis on human health and our environment.

- 90% diversion from landfill and carbon neutrality
- We're also a proud members of USGBC and LEED.
- Varia contains over 40% recycled material

3form has twelve electric vehicle charging stations and 100% electricity offset.

The background is an abstract composition of overlapping, semi-transparent green planes. These planes are oriented at various angles, creating a sense of depth and perspective. The colors range from a light, pale green to a deeper, more saturated teal. The overall effect is clean, modern, and architectural. In the lower right quadrant, the words "Reception Kiosks" are written in a large, bold, white sans-serif font. The text is centered horizontally within its area and stands out clearly against the green background.
